

BLACK TIGER

Premium Organic Soil & Crop Enhancer

BLACK TIGER is an advanced agricultural formulation designed to improve soil fertility, enhance root development, and support healthy crop growth. It helps increase nutrient availability, improves plant vigor, and boosts overall productivity for modern farming.

Key Benefits:

- Improves root growth and soil activity.
- Enhances nutrient absorption efficiency.
- Promotes healthy vegetative growth.
- Improves crop quality and productivity.
- Suitable for vegetables, fruits, field crops, and horticulture.
- Helps crops tolerate stress conditions better.

Usage & Application

BLACK TIGER can be applied through drip irrigation, soil application, or foliar spray depending on crop requirements and farming practices.

Crop Type	Purpose	Recommended Dosage
Vegetables	Growth & Root Development	2 – 3 ml per liter
Fruit Crops	Plant Vigor & Yield	3 – 4 ml per liter
Field Crops	Soil Improvement	2 – 3 ml per liter
General Application	Preventive Use	250 – 500 ml / acre

Precautions

- Shake well before use.
- Store in a cool and dry place.
- Keep away from children and food materials.
- Use protective gloves during handling and spraying.
- For agricultural use only.
