KEY APPLICATIONS

Livestock & Cattle Feed Formulation

Serves as a highly digestible energy replacement for grains (corn/wheat) in dairy feeds, increasing milk yield and fat percentage due to high sugar and fat contents.

Poultry & Swine Feed Mixes

Excellent low-cost ingredient to boost caloric density in poultry rations and swine diets, promoting rapid weight gain and lowering total feed blending costs.

Bakery & Confectionery Rework

Suitable for specialized industrial processing and rework where fine biscuit powder/crumb is utilized in secondary food processing or confectionery bases.

Aquaculture & Specialty Baits

Widely used as a binder and carbohydrate source in commercial fish feed pellets and specialty aquaculture feed manufacturing.
