Dosage	200 kg per acre
Application Method	Sprinkle on topsoil Mix using rotor/tractor
Watering	Water enough to moisten (not flood)
Sowing Time	After 24–30 hrs of application

Application Method

Sprinkle

Rotate

Irrigate

Why Choose Arogya Bhoomi for Grains?

Suitable for Natural Farming

Biochar is an age old natural organic carbon rejuvenator which results in high TOC & Organic matter

Soil Enrichment for Better Yield

Better nutrient absorption leads to healthier, faster-growing plants.

Microbial Support

Improves soil biology, which can naturally suppress harmful pathogens.

Balances Soil pH

Helps buffer acidic soils, improving conditions for plant growth.

Enhanced Aeration & Root Breathability

This boosts oxygen availability at the root zone, leading to stronger root development and overall plant health.

Boosts Water Retention

Absorbs and holds water in the soil, especially useful in drought-prone areas.
